

Equation of everything i.e. Quantum Fields: the Real Building Blocks of the Universe is Myth as Mathematics Does not have Thought of Mind And Thought of Creator.

Dr V M Das

Das Nursing Home, Fatehgarh, India University Of God

Abstract: Mind, the inner most box of nature has not been investigated by modern physicists .Mind has not been incorporated in Standard model. Mind can only be studied by participatory science. Having searched Basic building blocks of the universe i.e. mass part of reality, we have also investigated mind part of reality and finally two fundamental particles with mind and mass realities are hypothesized . Now we discuss how to further investigate mind so as to know their structures and functions. Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations. New words have been coined to understand hidden science of mind part of reality. Mind reality have been recognized as different faces by “I” about 5000 years back to Arjuna in Mahabharata. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different face represents different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties conscious ness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, It is automatic system of the universe. The mind realities which are of good properties have devtas face identity (first five faces on both side and those mind realities which are of bad properties have demons face identity (last four faces on both side) . These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles . It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP). There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes). That translates the messages and realizes it and reacts accordingly. Rest pictures are creation of different individuals and nature (sun, moon and snake and other pictures made on hands and body) by different thoughts of Almighty B.B.B. The entire picture has been explained in Geeta in 11/ 10 and 11. Whatever is being created in this universe is basically not by our thoughts rather it is the thought of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe.) that is dominated over creation and destruction of this cycle of the universe. Hence the World of Everyday Experience, in One Equation is Myth.

Keywords: Mind and Mass reality , Data Bank of all information s of the universe –CCP, messenger atomic genes(Code PCPs) , translating atomic genes (CP), Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe. Hoyle Narlikar Universe, Divine MONB

I. INTRODUCTION

1.1 The World of Everyday Experience, In One Equation [13]

Posted on January 4, 2013 by Sean Carroll

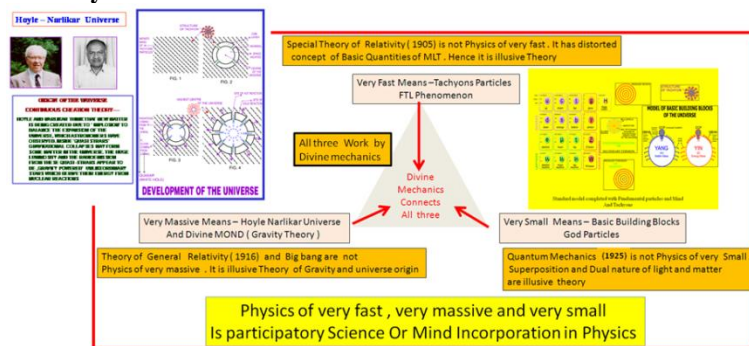

Longtime readers know I feel strongly that it should be more widely appreciated that the laws underlying the physics of everyday life are completely understood. (If you need more convincing: here,here, here.) For purposes of one of my talks next week in Oxford, I thought it would be useful to actually summarize those laws on a slide. Here’s the most compact way I could think to do it, while retaining some useful information. (As Feynman has pointed out, every equation in the world can be written $U=0$, for some definition of U — but it might not be useful.) Click to embiggen.

$$W = \int_{k < \Lambda} [Dg][DA][D\psi][D\Phi] \exp \left\{ i \int d^4x \sqrt{-g} \left[\frac{m_p^2}{2} R - \frac{1}{4} F_{\mu\nu}^a F^{a\mu\nu} + i \bar{\psi}^i \gamma^\mu D_\mu \psi^i + \left(\bar{\psi}_L^i V_{ij} \Phi \psi_R^j + \text{h.c.} \right) - |D_\mu \Phi|^2 - V(\Phi) \right] \right\}$$

quantum mechanics spacetime gravity
other forces matter Higgs

This is the amplitude to undergo a transition from one configuration to another in the path-integral formalism of quantum mechanics, within the framework of quantum field theory, with field content and dynamics described by general relativity (for gravity) and the Standard Model of particle physics (for everything else). The notations in red are just meant to be suggestive, don't take them too seriously. But we see all the parts of known microscopic physics there — all the particles and forces. (We don't understand the full theory of quantum gravity, but we understand it perfectly well at the everyday level. An ultraviolet cutoff fixes problems with renormalization.) No experiment ever done here on Earth has contradicted this model. Obviously, observations of the rest of the universe, in particular those that imply the existence of dark matter, can't be accounted for in this model. Equally obviously, there's plenty we don't know about physics beyond the everyday, e.g. at the origin of the universe. Most blindingly obvious of all, the fact that we know the underlying microphysics doesn't say anything at all about our knowledge of all the complex collective phenomena of macroscopic reality, so please don't be the tiresome person who complains that I'm suggesting otherwise. As physics advances forward, we will add to our understanding. This simple equation, however, will continue to be accurate in the everyday realm. It's not like the Steady State cosmology or the plum-pudding model of the atom or the Ptolemaic solar system, which were simply incorrect and have been replaced. This theory is correct in its domain of applicability. It's one of the proudest intellectual accomplishments we human beings can boast of. Many people resist the implication that this theory is good enough to account for the physics underlying phenomena such as life, or consciousness. They could, in principle, be right, of course; but the only way that could happen is if our understanding of quantum field theory is completely wrong. When deciding between "life and the brain are complicated and I don't understand them yet, but if we work harder I think we can do it" and "I understand consciousness well enough to conclude that it can't possibly be explained within known physics," it's an easy choice for me. Let me know if I've made any typos here, or have gone too far in trying to make things compact. For instance, can I get away without putting a "trace" around the gauge field kinetic term? I don't want a notational shortcut to undermine my argument and leave the audience believing in God.

What is New Physics or Physics of Mind ?

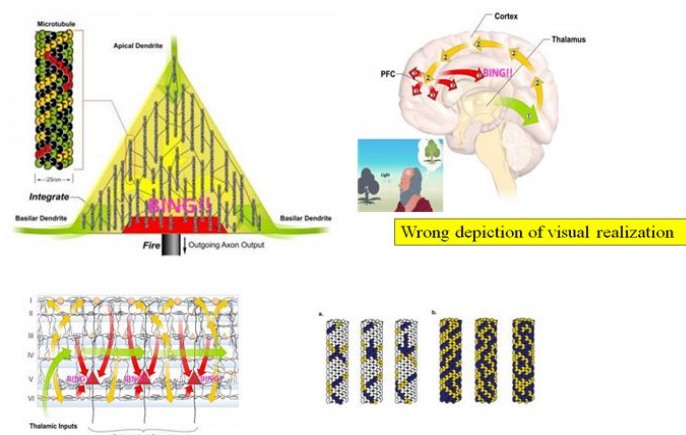

Physics of Mind

Quantum Consciousness – According to Physicists and Biologist [1]

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to *be* conscious – to have awareness, a conscious ‘mind’, but who, or what, are ‘we’ who know such things? How is the subjective nature of phenomenal experience – our ‘inner life’ - to be explained in scientific terms? What consciousness actually *is*, and how it comes about remain unknown. The general assumption in modern science and philosophy - the ‘standard model’ - is that consciousness emerges from complex computation among brain neurons, computation whose currency is seen as neuronal firings (‘spikes’) and synaptic transmissions, equated with binary ‘bits’ in digital computing. Consciousness is presumed to ‘emerge’ from complex neuronal computation, and to have arisen during biological evolution as an adaptation of living systems, extrinsic to the makeup of the universe. On the other hand, spiritual and contemplative traditions, and some scientists and philosophers consider consciousness to be intrinsic, ‘woven into the fabric of the universe’. In these views, conscious precursors and Platonic forms preceded biology, existing all along in the fine scale structure of reality.

My research involves a theory of consciousness which can bridge these two approaches, a theory developed over the past 20 years with eminent British physicist Sir Roger Penrose. Called ‘orchestrated objective reduction’ (‘Orch OR’), it suggests consciousness arises from quantum vibrations in protein polymers called microtubules inside the brain’s neurons, vibrations which interfere, ‘collapse’ and resonate across scale, control neuronal firings, generate consciousness, and connect ultimately to ‘deeper order’ ripples in spacetime geometry. Consciousness is more like music than computation. Colleagues Travis Craddock and Jack Tuszynski and I also study how anesthetics act in microtubules to erase consciousness, and with Jay Sanguinetti, John JB Allen and Sterling Cooley, we are studying how transcranial ultrasound (TUS) can be used noninvasively to resonate brain microtubules and treat mental, cognitive and neurological disorders. Many thanks to my assistant Abi Behar-Montefiore and Ed Xia for maintaining this website.

1.2 Mind and Mass Realities [2]

Fig. 1 Divine Mechanics Unit – CCP, CP and information s – Code PcPs with B-Bit – Mass

Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations. New words have been coined to understand hidden science of mind part of reality. Mind reality has been recognized as different faces by “I about 5000 years back to Arjuna in Mahabharata.as shown in Fig 1. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different faces represent different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties conscious ness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation . In all, it is automatic system of the universe. The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side) . These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked . It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles . It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes) . That translates the messages and realizes it and reacts accordingly.[2]

1.3. Messages From Biological world to understand B.B.B world as shown in Fig 2 [2]

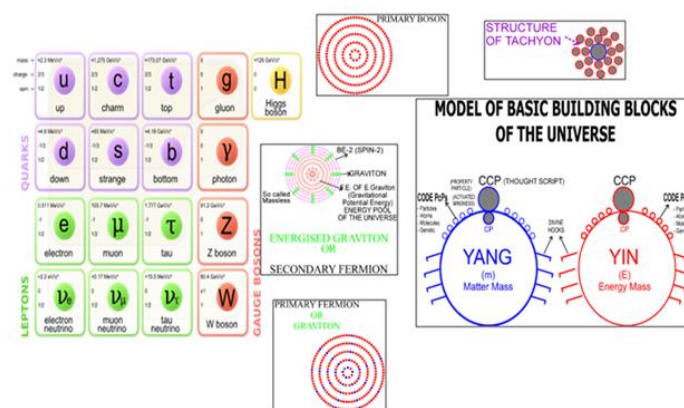

Fig. 2 Parallel teaching by participatory science

The standard model not only modified rather it has been completed [3] with introduction of energized gravitons , primary fermions, primary bosons , Basic Building Blocks , Mind and Tachyons as shown in Fig 3

Standard model completed with Fundamental particles and Mind And Tachyons

Fig. 3 standard Model chart [3]

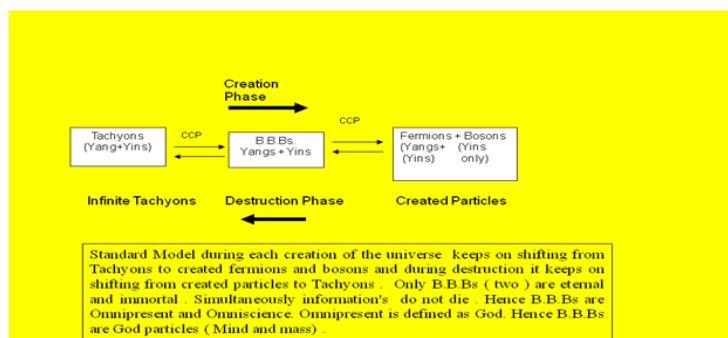

Fig .3.1 one creation and destruction cycle [4]

Participatory science has coined [5] some new words and there are some words which already exist in physics. Both these words are defined here and the definitions are according to participatory science. It has no relation with the definitions given in modern physics.

- 1) Mass -The part which gives shape to the smallest mass unit i.e. basics building blocks (B. B. Bs.) is called mass.
- 2) Matter:-Mixture of fermions and bosons or only bosons which are made up of mass (B.B.Bs) and that is why we realize their shape is called matter.
- 3) Inertial mass:-Mass (smallest mass units i.e. B. B. Bs) having inertial properties (classical inertia) either absolute rest or uniform motion in straight line is called inertial mass. Or Number of B. B. Bs. Per unit space present in bigger units is called inertial mass. Or Total matter contained by the bigger units or total number of fermions and bosons contained by the bigger units is called inertial mass. Therefore it never changes from place to place.
- 4) Gravitational mass:- The mass (interacting surfaces) which takes part in gravity (divine energized gravitons theory) interaction (which is due to mind) is called gravitational mass. When gravity interaction increases (number of divine energized gravitons increases) the interacting mass (interacting surface) also increases or when interacting mass (interacting surfaces) increases, gravity interaction (number of divine energized gravitons) also increases. Therefore gravitational mass (interacting mass or surfaces) changes from place to place. It is the fed mind that decides gravity interaction. We shall discuss it in gravity chapter and in atomic genetics.
- 5) Pure m (matter) mass:-matter mass (smallest mass unit or B.B.B) which have got inertial property of absolute rest.
- 6) Energy mass:-Energy mass (smallest energy mass unit B.B.B) which have got inertial property of uniform motion in straight line and which also gives shape to the bigger energy mass (Higgs Bosons etc) units.
- 7) m (impure matter) of $E=mc^2$:-Matter particles (fermions) which have got spin property are called impure matter particles.

1.4 Prayer message formation in brain.

Fig 4 Divine Mechanics - Prayer message formation in brain

In atomic transcription and translation of prayer [5], following steps take place on Yang B.B.B – B-Bit as shown in Figure 4.

- 1) CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
- 2) OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me”.
- 3) Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me”.
- 4) Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “o god help me”.
- 5) CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PCPs) and finally there is activated message of “o god help me” is formed.
- 6) CP represses atomic transcription by adding RM (green) to OM (orange). Thus atomic transcription gets halt.

Having formed the message it comes out in three forms.

In atomic genetic engineering (prayer) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how does the brain generate thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of '**O GOD HELP ME**' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called **THOUGHT RAY (Quantum entanglement)** which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards **REALIZING CENTER** situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER as shown in Fig 4

Where Does Prayer Message go ?

Prayer message goes as shown in Figure 5 to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called **ATOMIC GENETIC ENGINEERING** as shown in **Figure 4.1** The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. **Or diseased cell gets cured [6]** as shown in **Fig 4.1**

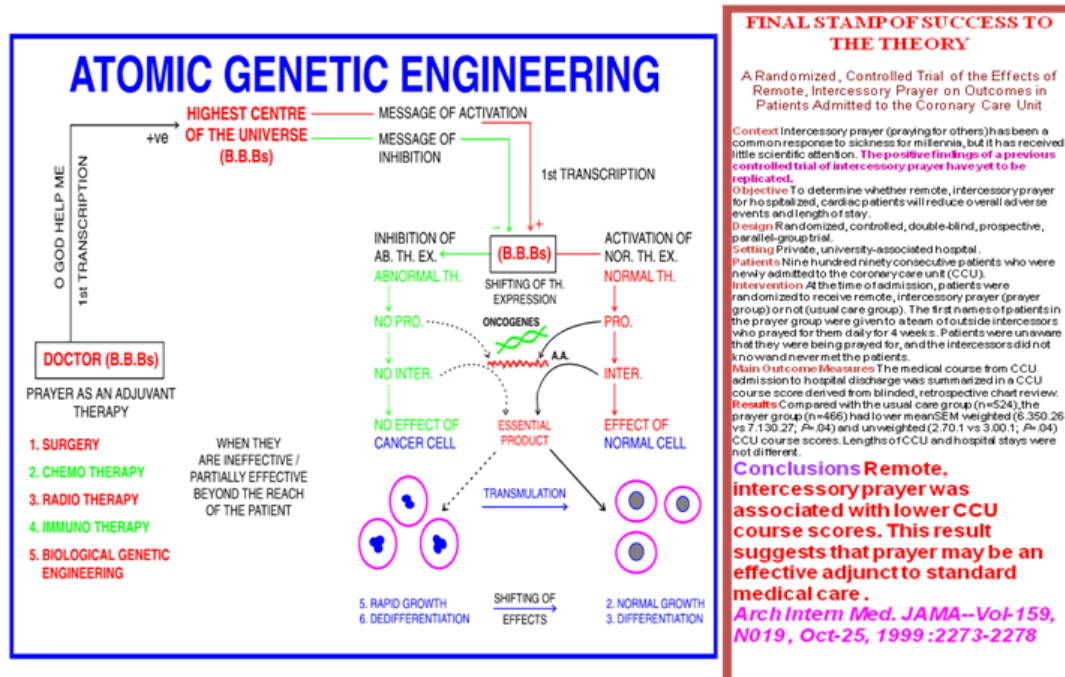

Fig . 4.1 A.G.E and Final stamp of success to New Theory[6]

1.5 Message system of the Universe

Before the origin of the universe [2] nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages (Code PcPs) used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (Code PcPs) with very very high velocity. It is the fundamental message system. After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PcPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms, molecules, cells, and even individuals talk with one another

After the formation of the cell, nature created one more system called THIRD TRANSCRIPTION. Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed. These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need. as shown in Fig 5

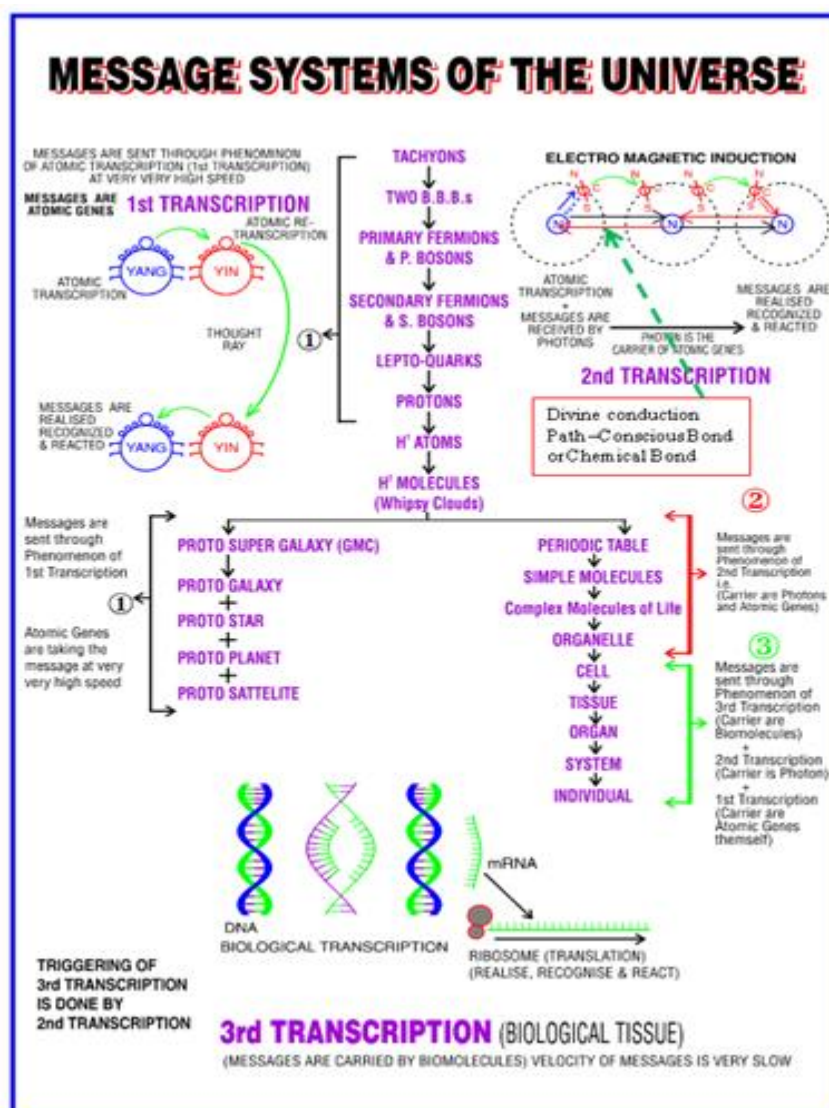

Fig. 5 Messages system of the universe

1.6 How does nature work & triggering of normal & abnormal effects

To understand creation physics as shown in Fig 6 and Fig 7. . There are two types of thought stimulation [2] . One is **CONDITIONED THOUGHT STIMULATION** and other one is **UNCONDITIONED THOUGHT STIMULATION**.

STIMULATION OF THOUGHT EXPRESSION --- There are two types of thought expressions one is **CONDITIONED STIMULATION** of thought expression, and other one is self stimulation of thoughts i.e. **UNCONDITIONED STIMULATION** of thought expression .At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is **THOUGHT** expression. These thought expressions were triggered by **UNCONDITIONED OR SELF STIMULATED WAY**. It is the first step and it is followed by **PROGRAMMING** or formation of programmed messages by code PCPs. This programmed message moves from higher centers to target B.B.Bs. it is called **INTERACTION**. Having received the messages, the mind and mass of the target B.B.Bs. work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target B.B.Bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called **EFFECT**. Appearance of new shapes. properties and laws is called **TRANSMUTATION**. The first three steps are collectively called **CCP**. During transmutation process if **CCP** is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmute. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

The subatomic particles are made up of more fundamental particles called Basic Building Blocks (B.B.Bs) which are made up of mind and mass. These B.B.Bs are divine in nature with the result they talk with each other by phenomenon called atomic transcription and translation (thought expressions). The triggering of broken symmetry is caused by atomic transcriptions. Unless the atomic transcriptions occur, subatomic particles could never exhibit phenomenon of broken symmetry. So the broken symmetry is never spontaneous. It is being mis understood that sub atomic particles do have spontaneous activities as far as broken symmetry is concerned. Hence the Nobel prize physics 2008 awarded to this work is too early to give prize.

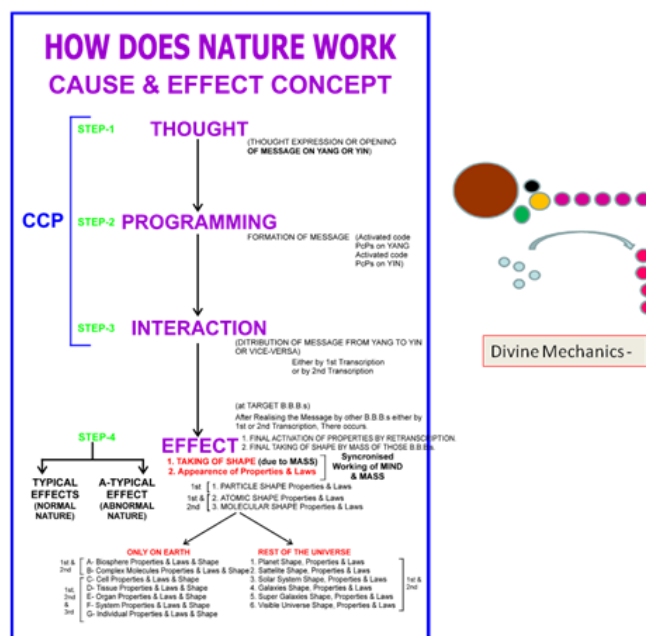

Fig. 6 Divine Mechanics – How Does Nature work ?

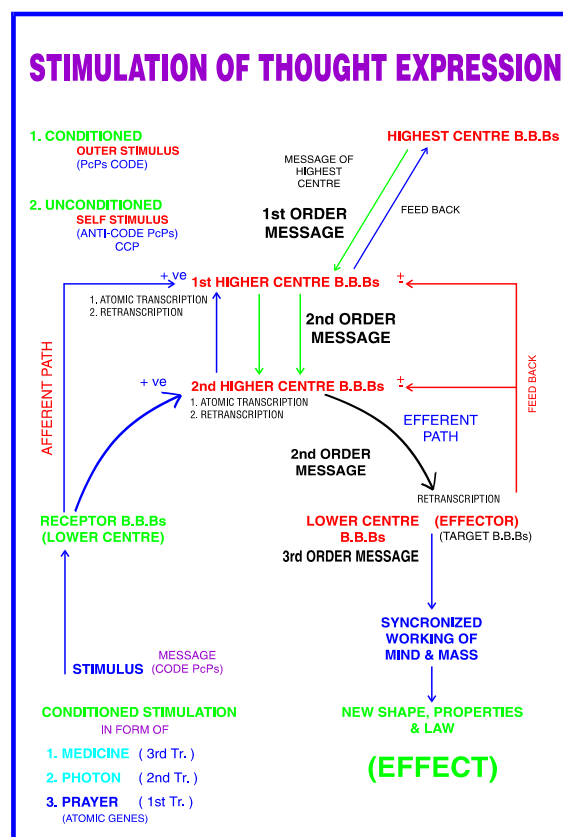

Fig. 7 Conditioned and Unconditioned thought expressions

1.7 Message network of the Universe (Feed Back Mechanism and different centers of the Universe)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs.[2] After primary units ,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons). Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feed back path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era as shown in Fig 8

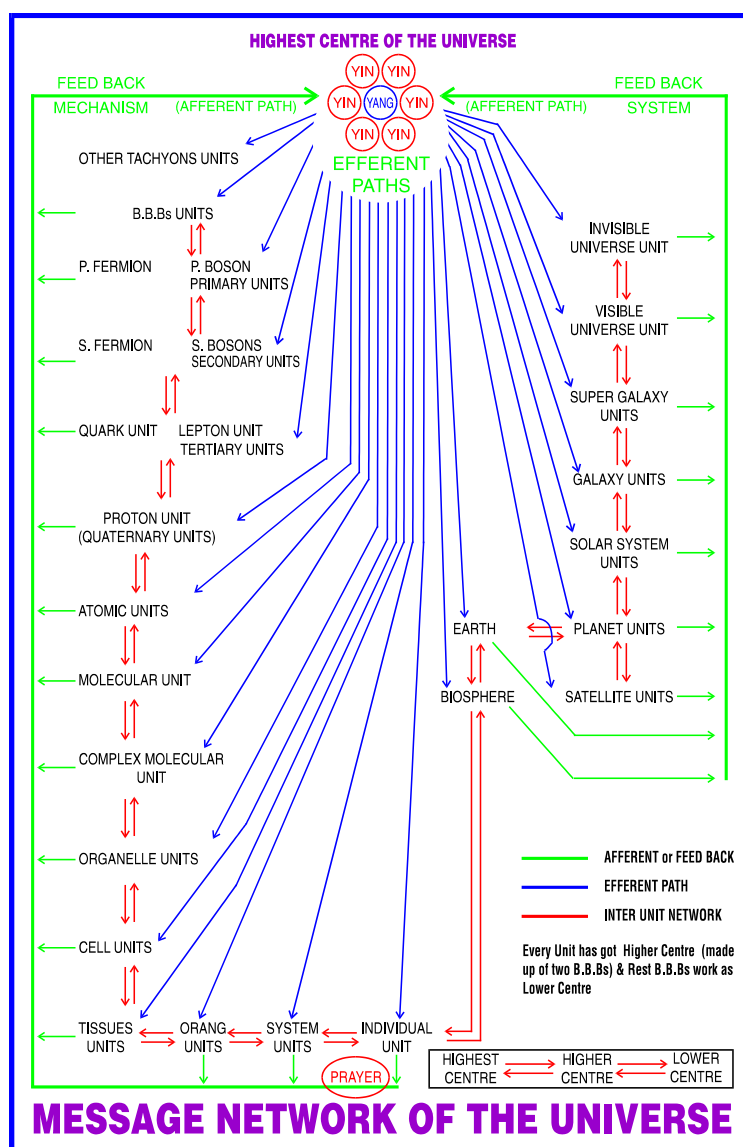

Fig. 8 Messages Net work of the Universe

1.8 Origin of the universe [7]

Hoyle – Narlikar Universe

ORIGIN OF THE UNIVERSE
CONTINUOUS CREATION THEORY----

HOYLE AND NARLIKAR THINK THAT NEW MATTER IS BEING CREATED DUE TO 'IMPLOSION' TO BALANCE THE EXPANSION OF THE UNIVERSE, WHICH ASTRONOMERS HAVE OBSERVED. INSIDE 'QUASI STARS' GRAVITATIONAL COLLAPSES MAY FORM SOME MATTER IN THE UNIVERSE. THE HUGE LUMINOSITY AND THE RADIOEMISSION FROM THESE QUASI -STARS APPEAR TO BE 'GRAVITY POWERED' UNLIKE ORDINARY STARS WHICH DERIVE THEIR ENERGY FROM NUCLEAR REACTIONS

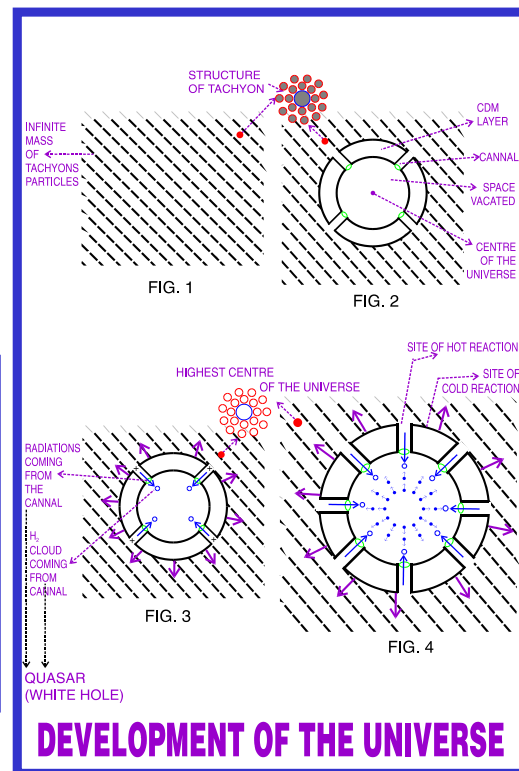

Fig. 9 Development of the Universe

Before the origin of the universe, these Basic Building Blocks (B.B.Bs) as shown in **Fig-3** were in the form of tachyons as shown in **Fig- 9** [7]. It means that at that time the tachyons were everywhere in the universe. Let us look at the structure of tachyons; it is made up of one matter B.B.B. (YANG) and many energy (YINs) B.B.Bs. Initially out of the infinite tachyons, one became the **highest center** of the universe. Messages used to go from highest center to rest of the universe and messages could come from rest of the universe to highest center of the universe by atomic transcription. Thus highest center had fed its thought to rest of the B.B.Bs. that would take part in creation - that they would express only those thoughts to give desired effect as wished by the highest center of the universe. So all B.B.Bs were informed about their role before creation of the universe. In pre-creation era programming of the future universe was done by highest center of the universe. Our universe is oscillating and it is a divine universe. It means that it has a creation phase and a destruction phase. During creation phase tachyons break into their B.B.Bs. and from these B.B.Bs, formation of fermions and bosons take place as shown in **Fig 3.1**. After the creation phase, destruction would start and in this phase all created particles would again break into their B.B.Bs and finally tachyons would form. At the time of origin of the universe, all the effects got created. These effects are taking of different shapes and appearance of properties and laws. All these effects are studied in various branches of science.

With the origin of the universe, nature first created a sphere of **COLD DARK MATTER (C.D.M)** and canals in it. With the result space got created. At the other end of the canals, hot reaction started (**the relics are back ground radiations 2.7 degree K of our hydrogen clouds**). As a result hydrogen clouds and lot of radiations were created. The empty canals were filled by these hydrogen clouds and radiations and thus **QUASARS** appeared in the universe. Simultaneously C.D.M. layer started expanding and clouds and radiations kept on coming in this closed universe as shown in **Fig 9**. With the passage of time more and more C.D.M. layer formed, more and more quasars formed. The hydrogen cloud came in this closed universe. They started running towards C.D.M. layer as they were attracted by the gravity of C.D.M. layer. Those clouds, which were nearer, moved faster than those, which were away from CDM Layer. The **HUBBLE LAW**, can thus be explained. With some more passage of time, clouds were joined to form **GMC** (giant molecular clouds). Later by self-gravitation different proto stars, proto planets, proto satellites were formed. Finally stars became bright and thus bright galaxies appeared in this universe. Our universe is still in expansion phase and creation is still going inside quasars. It is to be remembered that highest center of the universe does not come in the visible universe. It keeps on receiving the messages by atomic transcription and it has power to change any programming programmed by it during pre-creation era.

1.9 DM and DE i.e. energized gravitons and energy pool of the universe as shown in Fig 10 and Fig 11 [8]

Fig. 10 Structural configuration of Leptons and Quarks as regard DM and structural configuration of DM and DE at micro level

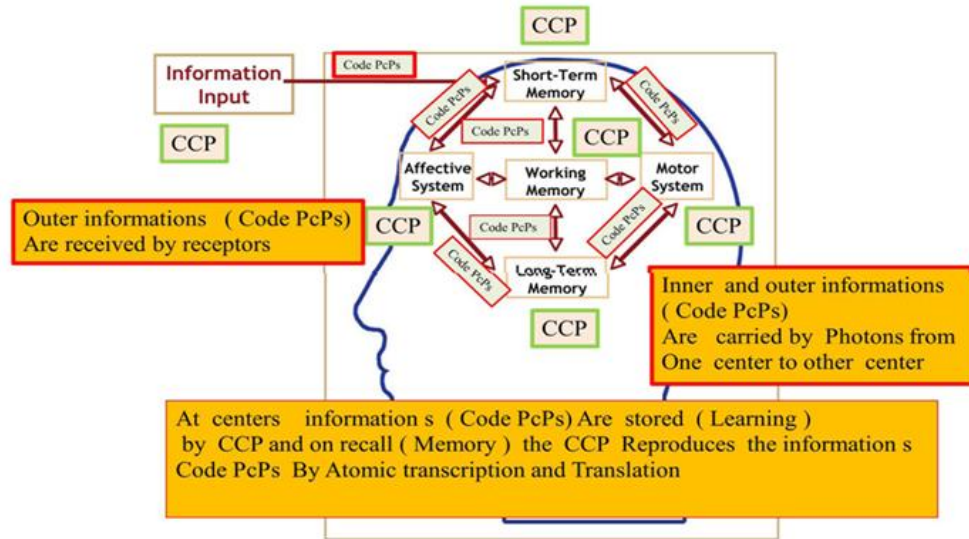

Fig 11 structural configuration of DM and DE at macro level [9]

1.10 Divine Mechanics and Brain Computation

Learning and Memory and information s (Code PcPs) Net work in Brain [10]

Divine Mechanics and Brain Computation

Fig 12 Divine Mechanics of Brain Computing System – Learning and memory

At all steps, these are B.B.Bs (B-Bit) that are responsible for information's control and triggering . If CCP is written it means unless atomic transcription and translation occur, brain cannot have learning and memory triggering and control and it is called Divine mechanics of Biology and it is life. These are higher thought expressions of B.B.Bs. In Bits of classical computers and qubits of QC, the thought expressions are lower and different but the mechanics (DIVINE) remains the same. as shown in Fig 12

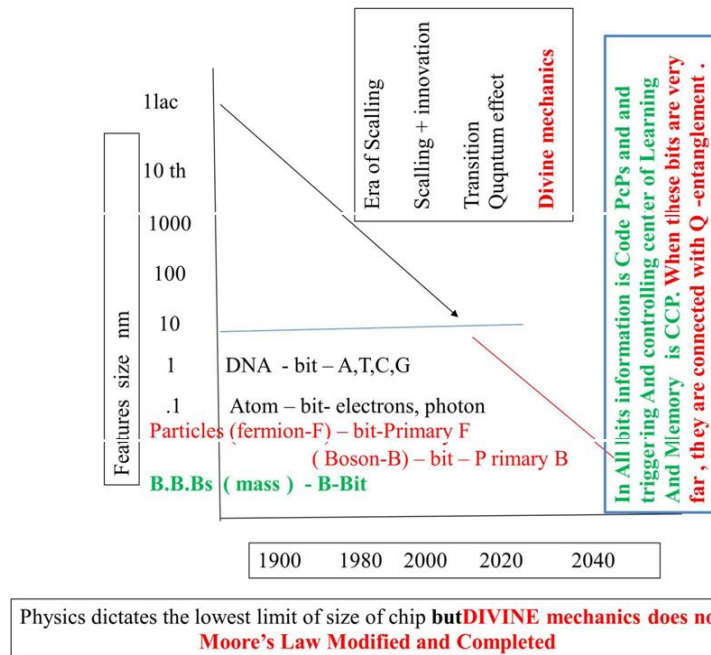

Fig 13- The Theory of Computers and Brain are same – DIVINE MECHANICS

(Structural and Functional smallest Bit (mass) is B-Bit of the universe and the Divine Mechanical Unit is CCP , Code PcPs and CP.)

DIVINE MECHANICS The Theory of Computers and Brain is SAME as shown in Fig 13

Physics dictates the lowest limits of the size of chips [11]. But divine mechanics does not. Hence the bit is a typical unit of information. ((Classical and Quantum Bit) is wrong and to describe informations by adding qubit is also illusion as in complicate system, it is the different thoughts expressions that describe informations. Informations are separate (Code PcPs) and bits (Electron of transistor) qubits (electron of diamond crystal) are separate. At DNA level the bit is nucleotide (A,T,C,G) and at Atomic level the bit is photon and electron, at particle level (secondary fermions and secondary bosons) the bit is primary fermions and primary bosons and informations are still code PcPs and at B.B.B level the bit is B.B.B (Yang mass and Yin mass - B-bit) it self and the information is carried by Code PcPs but at all level of all bit units the information storage system is CCP (Physiological arrow of Time) it never dies even after destruction of the universe. Hence informations are eternal. In computers, Bit is a structural configuration that describes informations of the system and informations are in form of Code PcPs. The working of the bit is triggered and controlled by thoughts of higher centers that form that bit. If the bit is classical (transistors of chips) the effect is different. But if the bit is qubit with entanglement the working is triggered and controlled by thoughts of higher center that form that crystal. In both the effect of describing informations would be different. One is classical (thought expressions are fixed and limited) and other one is quantum (thought expressions are changing and more wide to describe the more wide complicated system to have fast results). In life sciences in Brain the bit is again Photon and the informations are Code PcPs and they are triggered and controlled by CCP of higher centers that is triggered by DIVINE MECHANICS.

In life sciences the CCP (cryptography) of B-bit expresses informations (Code PcPs) which were not fed like speaking Lie and unlike Bit of classical computer and qubit of QC it shows phenomenon of forgetfulness and IQ phenomenon (mental age /real age). It is Higher functions of B.B.B or B Bit and it is life. Hence there is difference in some aspect of DIVINE MECHANICS of Computers computation and Brain computation

II. STRUCTURE

2.1 Modified theory of atomic structure as Niel Bohr's theory has limitations in explaining different series of hydrogen spectra.

New assumptions of structure of hydrogen atom.— Divine Modified Niel Bohr's Theory (**Divine MONB**)

1. Hydrogen atom is like a miniature solar system with the negatively charged electron moving in circular orbit around positively charged nucleus having positively charged particle proton. In this circular orbit or stationary orbits, electron is being held by single string of energized gravitons. This energy level is called ground state.
2. When Hydrogen atom is excited, the electron moves from ground state to excited state energy levels making a bigger circular orbit and having reached in this new energy levels, it also emits radiations. Hence absorption and emission of energy quanta occur simultaneously. Shifting is understood in inter orbital shift phenomenon.
3. When excitation is over, the electron once again come back to ground state energy level. All above mentioned events are triggered by different thoughts or atomic transcriptions from the nucleus or proton in case of hydrogen atom.
4. These atomic transcriptions are being triggered by conditioned stimulation of CCP by the message system made up of photons (second transcription or -ve charged photons or afferent path) coming from electron to proton and further they are transmitted by photons (second transcription made up of +ve charged photons, or efferent path) to electron. Having received the messages, electron works accordingly. Unless the thought is expressed, nature cannot work. as shown in Fig 7
5. When electron is in ground state, its interaction with energized graviton and electromagnetic photon is more hence IP -13.59ev (n=1) is required to remove electron from this energy level. During excited stage the interaction is different hence I.P. to remove electron from this state is -3.4ev (n=2), -1.511ev (n=3), -0.850ev (n=4), -0.544ev (n=5) respectively. It is the changing thought of interaction with energized graviton and electromagnetic photons that gives changing effect.
6. Electronic configuration of higher atoms could be known by studying I.P. curve. Working of hydrogen atom as shown in Fig 14.

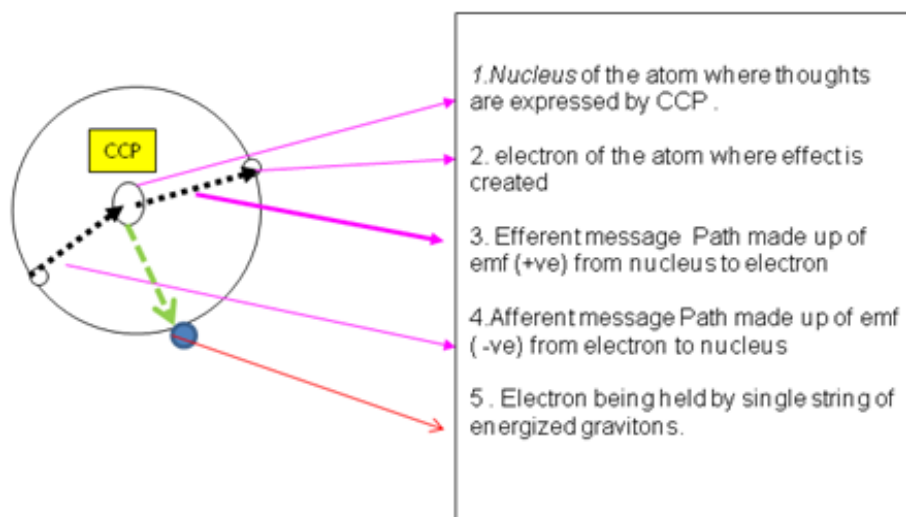

Fig 14 working of hydrogen atom – Divine MONB Theory

2.2 Clues regarding mind part of reality.

Clues regarding mind (atomic genes) part of reality

Fig 15 God form of “I” It is by virtue of Almighty power and by unconditioned working of B.B.Bs. Almighty B.B.B has power to make any physical law that we do not have.

~+*Avatar of “I” gave the first teaching of Mind to Arjun in Mahabharata.----- Avatar of “I” showed this teaching by His God Form. This portrait gives many messages about deep mysteries of the universe that we shall discuss time to time . The clue picture is *God form* of “I” as shown in GEETA. It is the clue as regard to the mind part of reality as shown in figure 15 . It does mean that mind or conscious particles or atomic genes are found in the nature. In standard model mind has not been incorporated.

Revealing innumerable wonders, innumerable mouths and eyes, decorated with innumerable dazzling ornaments, armed with innumerable gleaming weapons, magnificently attired and resplendently garlanded, annointed with exquisite, celestial fragrances, completely amazing and phenomenal, unlimited, brilliant and all pervading.

Translation---11/10-11-----[1]

2.3 Definition of Atomic genes

UNIVERSITY OF GOD**

DEFINITION

ATOMIC GENES ARE MEMORY SYSTEM OF ATOM PRESENT ON B.B.Bs. AND THEY ARE MEDIATED BY MIND AND ANTIMIND PARTICLES THUS DETERMINISTIC ORDER OF THE UNIVERSE IS CONDUCTED BY THESE PARTICLES

2.4 Father of cell Genetics

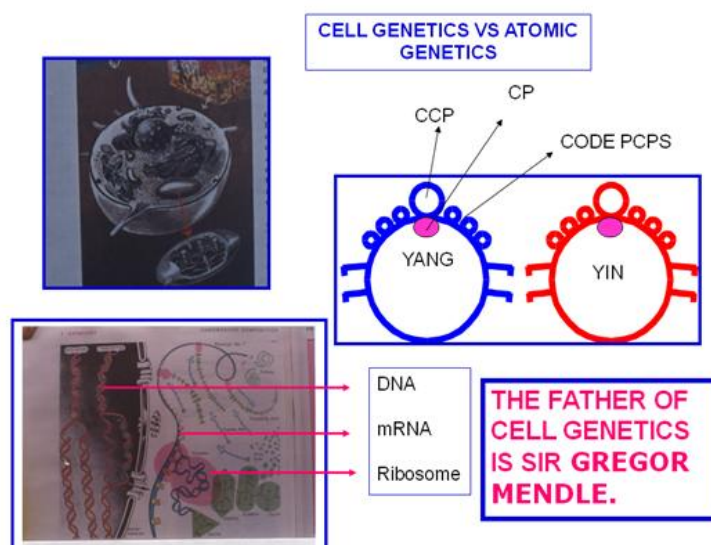

Fig-16 :To understand atomic genetics , one should know cell genetic

Fig 17 - DNA Script (left) and biological transcription and translation (right) both are found in Human cell (above)

To understand cell genetics, we should know structure and function of genes .Chromosomes carry informations in form of DNA. It is a script During transcription mRNA forms as it prints messages from DNA and carry messages from nucleus to cytoplasm where ribosome translates the messages and it work accordingly i.e. formation of polypeptides (PROTEIN SYNTHESIS) take place . Polypeptides are enzymes and hormones carrying programmed messages (Code PCPs) to carryout fixed programmed work as destined in DNA as shown in figure 17 . DNA is made up of four nucleotides called A,T,C,G (adenine , thymine, cytosine and guanine) . mRNAs are made up of four nucleotides called A,U,C,G(adenine , uracil , cytosine and Guanine) . They form code or codon (triplet code , one triplet code represent one amino acid) of mRNAs. mRNAs carry informations in form of triplet codons from DNA anti triplet code or codons . The DNA counter part is made up of four nucleotide i.e. A-T, C-G (T for thymine) . During transcription, A of DNA combines with U of mRNA, C of DNA combines with G of mRNA . T of DNA combines with A of mRNA, G of DNA combines with C of mRNA. (A-U, C-G, T-A, G-C) as shown in Figure 17.1 . If mRNA is made up of codon script then DNA is made up of anti codon script . If messenger atomic genes are mind Code PCPs then the CCP (equivalent to DNA) is made up of Anti mind particles (most mysterious structure of universe or thought script-CCP) .

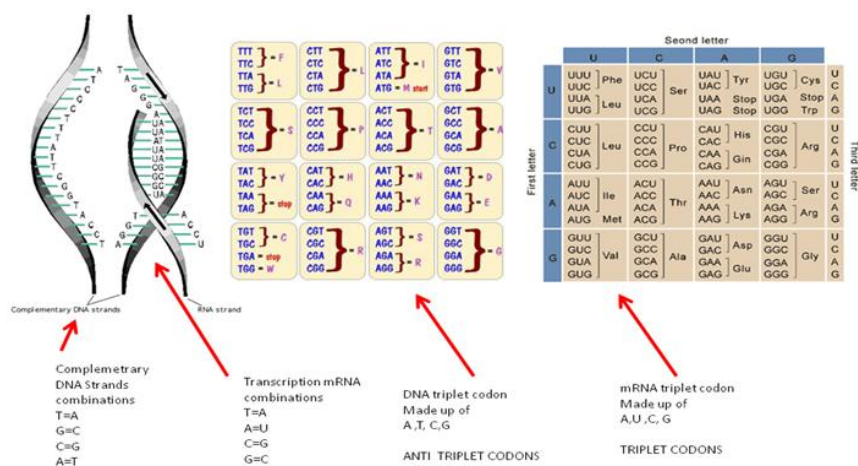

Fig 17.1 – DNA is made up of Anti triplet codons while mRNA is made up of triplet codons

During transcription, A of DNA combines with U of mRNA, C of DNA combines with G of mRNA . T of DNA combines with A of mRNA, G of DNA combines with C of mRNA.(A-U, C-G, T-A, G-C). If mRNA is made up of codon script or triplet codon then DNA is made up of anti codon script or antitriple codon. If messenger atomic genes are mind Code PCPs then the thought script (equivalent to DNA) is made up of Anti mind CCP (most mysterious structure of universe or thought script-CCP) . If the face identity of mind Code PCPs is male the then the face identity of anti mind CCP is female. (Not shown in Figure 1)

Fig 18 Induction of protein synthesis **Fig 19** Repression of Protein synthesis

INDUCTION OF PROTEIN SYNTHESIS (as shown in figure 18) - Structure of DNA - There are three genes involved in protein synthesis one is regulator gene which works through repressor protein, operon which is made up of structural genes and operator gene. During induction regulator gene which forms repressor protein (red cap) is removed from operator gene by hormones, metabolites or embryonic organizers etc. Thus operator genes get activated. It activates structural genes (DNA script) to form mRNAs (blue threads). mRNAs form polypeptides chains and finally hormones and enzymes (black threads). (ribosome has not been shown)-**REPRESSION OF PROTEIN SYNTHESIS** (as shown in figure 19)- During repression, the hormones, metabolites or embryonic organizers etc along with repressor protein (red cap) which is formed by regulator gene, come in contact with operator gene to stop its activation to structural gene. With the result structural genes stop forming mRNAs and finally formation of polypeptide chain formation gets stopped.

Fig 20 Induction of protein synthesis

INDUCTION OF PROTEIN SYNTHESIS as shown in figure 20 - Structure of DNA - There are three genes involved in protein synthesis one is regulator gene (green) which works through repressor protein. Operon which is made up of structural genes (magenta) and operator gene (orange). During induction, repressor protein (green) is removed from operator gene by metabolites (lactulose). Thus operator genes get activated. It activates structural genes (DNA script) to form mRNAs (magenta threads) from inactivated nucleotides (adenine, guanine, uracil and cytosine). mRNAs are being formed from exon and intron structural genes. After this there is phenomenon of splicing where meaning full mRNAs (messages) are formed and after that there is translation by ribosome (brown) and there is formation of polypeptides chains and finally hormones and enzymes are formed.

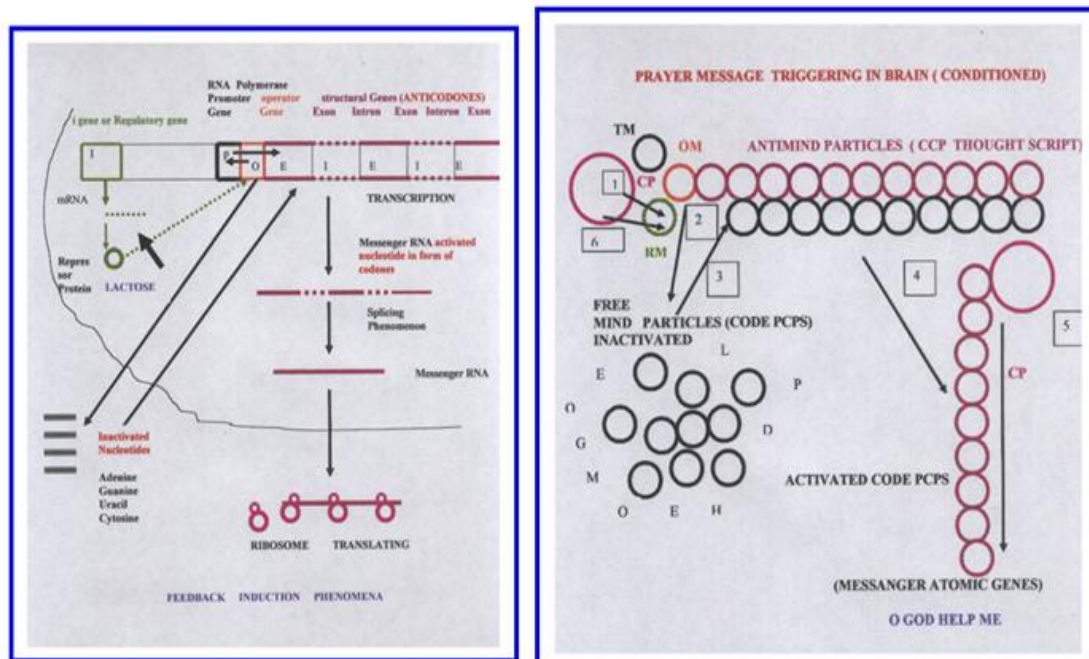

Fig 21 Repression of protein synthesis

REPRESSION OF PROTEIN SYNTHESIS as shown in figure 21 – During repression , co-repressor along with regulator gene which work through repressor protein (green) , come in contact with operator gene (orange) to stop its activation to structural gene(magenta) , There is no activation of nucleotides (adenine , guanine , uracil and cytosine) by operator gene. With the result structural genes stops forming mRNAs (magenta) and finally formation of polypeptide chain formation gets stopped.

CELL GENETICS

ATOMIC GENETICS

CELL GENETICS- Structure of cell genetics .	ATOMIC GENETICS – Structure of atomicgenetics
Regulatory gene - repressor protein	1. RM – repressor mindness (green)
Operating gene	2. OM- operating mindness (orange)
Structural gene (exon and intron)	3. CCP or thought script(Anti mind particles) (Magenta)
Inactivate Nucleotide (A,T,U,G)	4. Free inactivated code PCPs (Black)
mRNA (activated nucleotide)	5. Messenger activated code PCPs (Magenta)
Ribosome (translating biomolecule)	6. CP translating mindness (Brown)
RNA polymerase (promoter gene)	7. TM – time mindness (Black)

2.5 Face Identity of mind particles

Fig 23 structure and function of atomic genes symbolized. Different atomic genes have been symbolized as different heads).

ATOMIC GENES---- The conscious particles by virtue of which matter and energy attain transmutation phenomenon, properties , laws , interactions, message systems , behavior, life phenomenon, thought phenomenon, creation phenomenon is called atomic genes . They are the mind particles which conduct deterministic order of the universe.

PARTICIPATORY SCIENCE----- To study the nature by a new discipline in which realization and Common sense is the main tools other than observations. For example - as we realize that we work through phenomenon of thought similarly nature works through phenomenon of thought. As we realize that our walking is triggered by our mind similarly electron moves through triggering of its mind. As we interact through thought message system similarly forces interact through thought message system. Our behavior changes with change of thought similarly properties of the matter and energy change with change of their thoughts. We do research by principle of analogy or parallel. It is a new way to know unknown by the help of known knowledge. The known knowledge is either biological knowledge or mystical knowledge.

To understand consciousness and its working we have to understand this picture of God particle. Consciousness has been shown by different heads, It means each conscious particle has definitive shape and properties by virtue of which it has power to activate and inactivate that property that we study in different branches of science or we realize too. For example “ o god help me ” . It is an activated consciousness or atomic genes formed in brain carried by sound photons to our ears . As soon as we realize this sound effect of “ O God Help Me ” , it gets inactivated inside our brain (in RAS).

It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different face represents different types of properties carrying property. The open eyes means property is activated while close eye means property is

inactivated. In spite of carrying properties conscious ness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation . In all, It is automatic system of the universe . The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind reality which are of bad properties have demons face identity (last four faces on both side) . These are named as code PCPs or messenger atomic genes . The central face is CCP or Thought script where all thoughts of the universe are banked . It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information's of the universe are stored as anti mind particles . It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes) . That translates the messages and realizes it and reacts accordingly . Rest pictures are creation of different individuals and nature (sun , moon and snake and other pictures made on hands and body) by different thoughts of Almighty B.B.B. The entire picture has been explained in Geeta in 11/ 10 and 11 [1] .Whatever is being created in this universe is basically not by our thoughts rather it is the thought of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe.) that is dominated over creation and destruction of this cycle of the universe. as shown in figure 9.1

2.16 Conditioned stimulation of CCP and phenomenon of life .

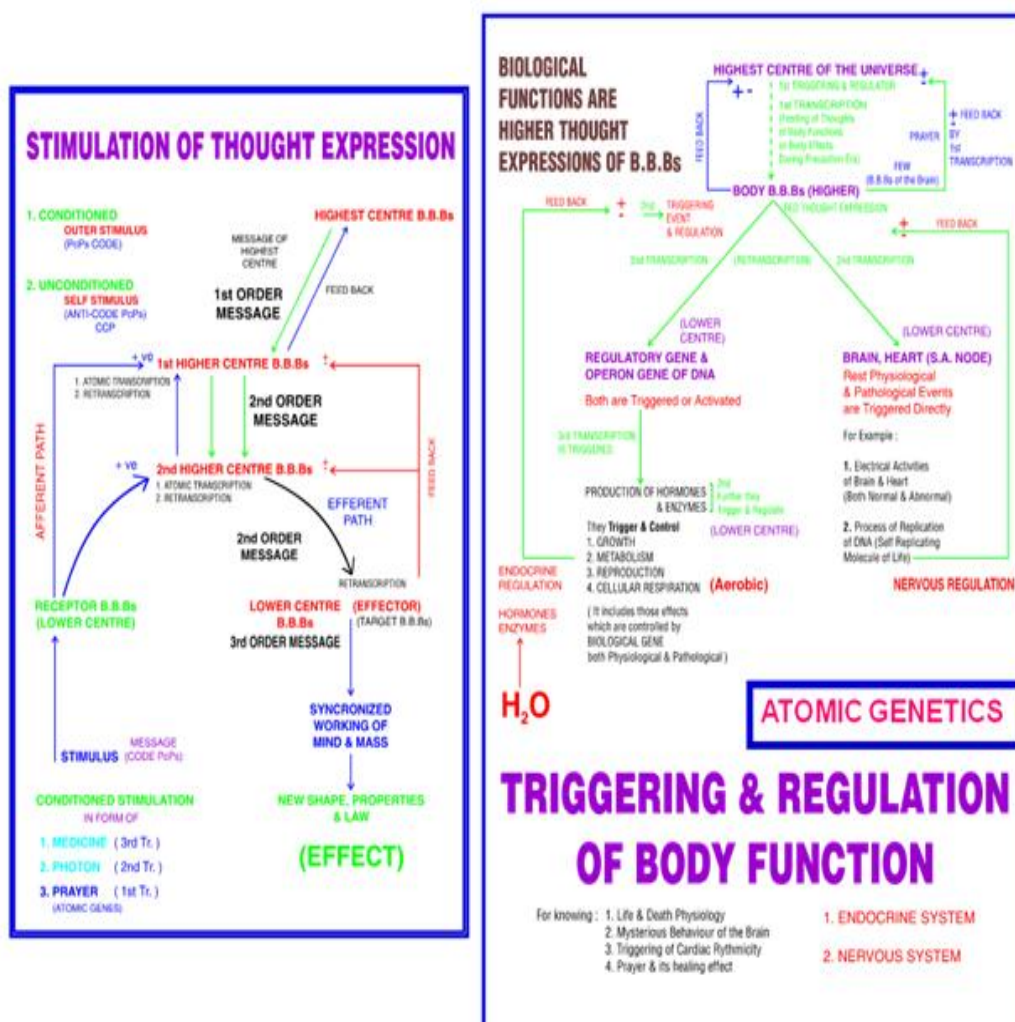

Fig 24 Stimulation of thought expression by conditioned

Few body functions are triggered by unconditioned thought expressions like mysterious behavior of brain i.e. creative thoughts , few dreams and triggering of cardiac cycle i.e first systole in utro . Few other functions are triggered by conditioned stimulation of thoughts like life and death physiology i.e. if you add water , you would see life effect and if you remove water , you would see death effect and prayer and its healing effect.

2.7 unconditioned and conditioned stimulation of CCP in life phenomenon

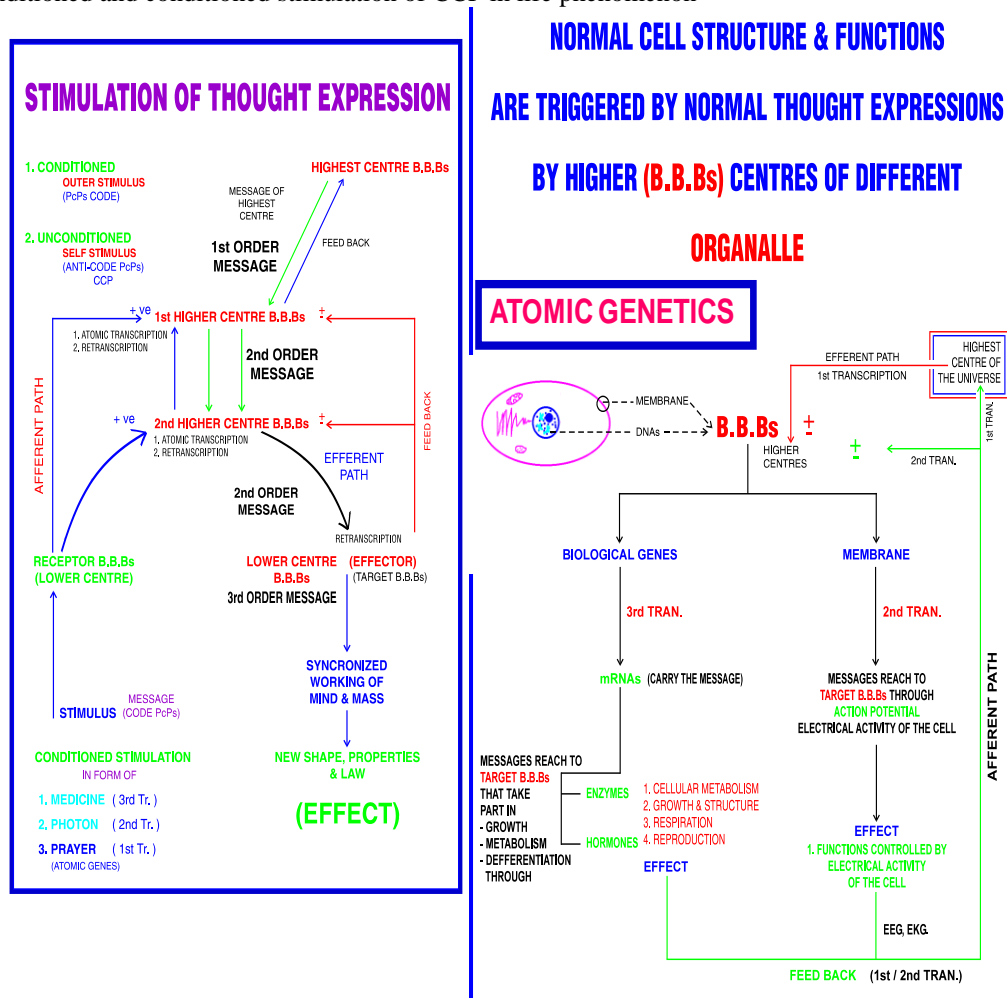

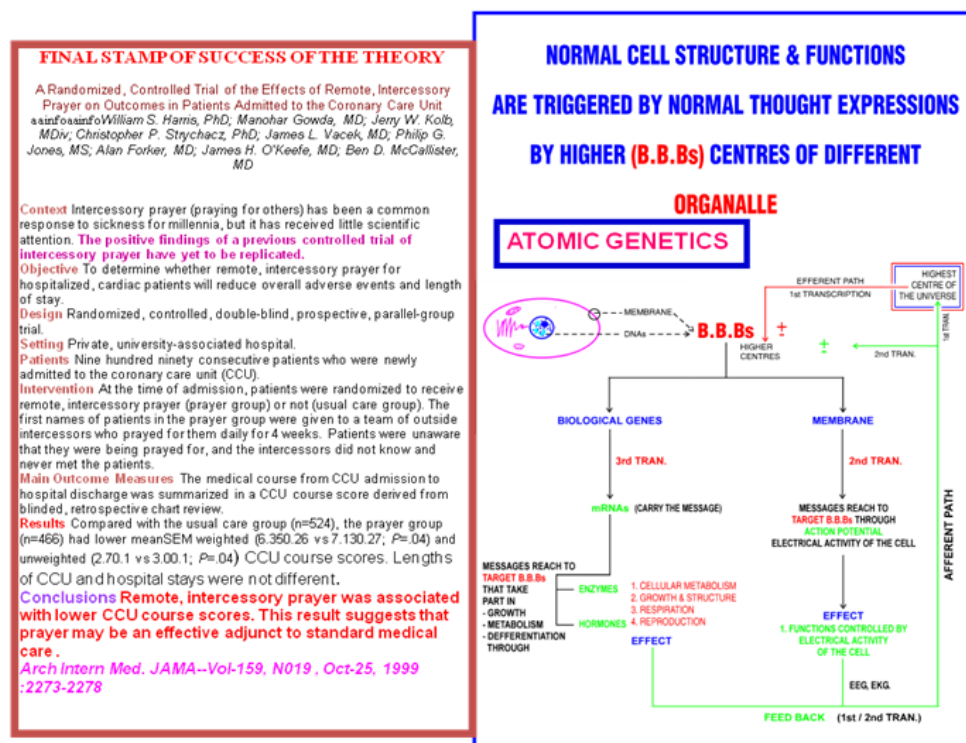

Fig 25 Stimulation of thought expression by unconditioned or conditioned in our body

Triggering and regulation of cell functions or cell physiology as shown in Fig 25

Normal cell structure and function are triggered by atomic transcriptions or thought expressions by higher centers (B.B.Bs.) present inside the cell. These higher centers are found in **DNAs** and in the membrane. Higher centers in **DNA** express thoughts. The programmed messages (code PCP) are carried by photons from nucleus of the atom to electrons. Thus messages come on the surface of **DNA** molecule. These messages shift to mRNA during third transcription. **mRNAs** carry the messages (code PCPs) from nucleus to cytoplasm where messages are translated by ribosome. Simultaneously, messages shift to peptide chains (enzymes & hormones). These enzymes and hormones carry the messages to target units (B.B.Bs.). Having received the messages, target units work accordingly and life effects like metabolism, cellular respiration, growth and structure formation, and other metabolic effects are observed. There is feedback of the effects to the higher centers. Thus triggering and regulation of metabolic functions are carried out. Similarly, the higher centers of membranes express thoughts. These thoughts are carried by photons from nucleus to the electron of the atom. Thus messages (code PCPs) come on the surface of the membrane. Here they are modulated on pace maker electrical activity and further on action potential and thus action potential (second transcription) carries the messages from one part of the cell to the other part of the cell. This is called electrical effects (EEG and ECG) of the cell. There is feed back of these effects to higher center and thus these effects are triggered and regulated. Both the effects (metabolic and electrical) have their feed back not only to higher centers but also to highest centers via first transcription. So highest centers are well informed about all effects of the cell. Higher centers are not autonomous centers rather they are also under control of highest centers of the universe.

2.8 Body functions and their regulation by different centers

STIMULATION OF THOUGHT EXPRESSION --- Shifting of thought expressions from normal to abnormal could be triggered by either from outer stimuli i.e. **CONDITIONED STIMULATION** of thought expression, which is caused by physical and chemical carcinogens or viruses etc or it is self stimulate i.e. **UNCONDITIONED STIMULATION** of thought expression , which is caused by hereditary factors.

2.1 0 Conditioned stimulation of CCP phenomenon of Germination

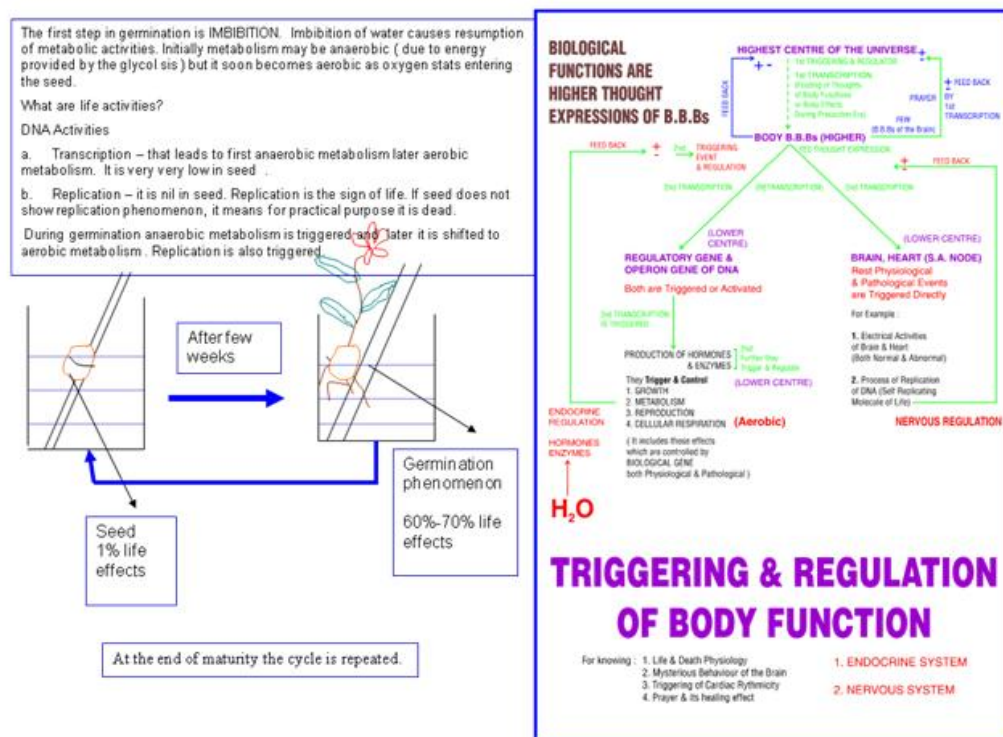

Fig28 Stimulation of thought expression by conditioned

Few functions are triggered by conditioned stimulation of thoughts like life and death physiology i.e. if you add water, you would see life effect and if you remove water, you would see death effect

2.11 Conditioned stimulation of CCP and phenomenon Dispersion of White light

Fig 29 Stimulation of thought expression by conditioned

Formation of VIBGYOR is due to conditioned thought expression of CCP of the prism atoms. Unless different thoughts are expressed, VIBGYOR formation could not take place. The same is true for white light formation from VIBGYOR in reverse prism. Here reverse thoughts are expressed, as shown in figure 29 and figure 29.1

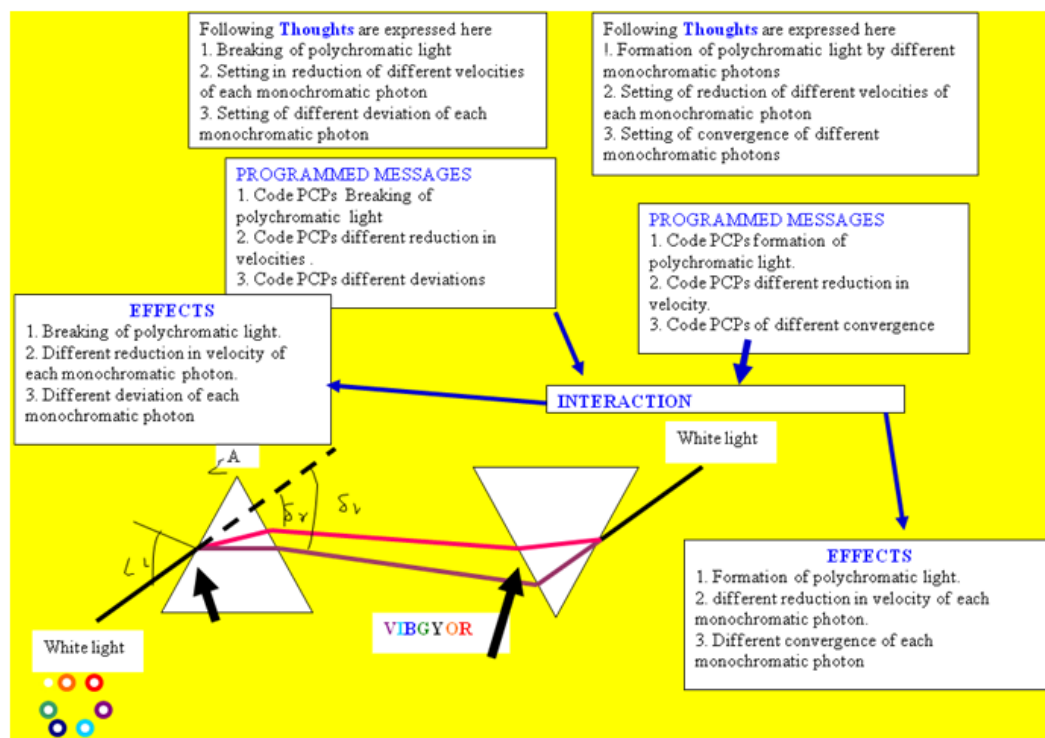

Fig 29.1 Stimulation of thought expression by conditioned

2.12 Laws on which atomic genes work.

Atomic Genetics and genetic damage as shown in figure -30

Having read **Atomic genetics and Basic etiology of the cancer**, now we discuss how atomic genetics trigger molecular effects like genetic damage etc during carcinogenesis. **ATOMIC GENETICS** is a new branch of science in which we study about **Laws, PROPERTIES** and **FUNCTIONS** of atomic genes. Now I shall highlight the laws on which atomic genes work. As we have seen that Gregor Mendel had made three laws of inheritance known as ---

1.The principle of Dominance---- Mendel therefore concluded that what were transmitted from parent to offspring were discrete factors. Each factor contained information about the form of the trait. The factor associated with the form which was expressed in the hybrid offspring (F1) was **DOMINANT**. For example, the factor for yellow seed color was a dominant factor. The factor associated with the form which remained hidden in the **F1** but reappeared in the **F2** was **RECESSIVE**, Thus the factor for the green seed color was recessive. Mendel's factor is now recognized as the gene. In atomic genetics this law is interpreted like this ---- During atomic transcription or thought expressions few thoughts are expressed and these are called dominating thoughts and rest thoughts which are not expressed are called recessive thoughts. Thus particles, atoms and molecules show only those properties which are triggered by dominating thought expressions. **During transmutation, dominating thoughts get recessive while recessive thoughts get dominant.** Single effect or property is triggered by single dominating thought expression or atomic transcription.

For example-- Normal genetic arrangements are triggered by normal arrangement genetic dominating thought expressions while genetic damage is triggered by abnormal arrangement genetic dominating thought expressions. Abnormal arrangement genetic thought expression is triggered by carcinogens only after normal arrangement genetic thought expressions get recessive. Or we can say normal genetic arrangement are triggered by normal arrangement genetic thought expressions and when carcinogens come in contact with the cell, they shift the thought expression from normal to abnormal genetic arrangement. With the result we observe genetic damage. Thus carcinogens suppress dominating normal arrangement genetic thoughts and they trigger abnormal arrangement recessive genetic thoughts. With the result genetic damage is seen.

2.The Principle of Segregation---The principle of segregation states that allele pairs separate or segregate during gamete formation, and the paired condition is restored by random fusion of gametes during fertilization.

In atomic genetics it will be interpreted like this --- There is separate atomic transcription for separate effects. So if there are hundred effects, they all are triggered by hundred separate thought expressions or atomic transcriptions.

For example --- Genetic damage is triggered by separate thought expression and rapid growth is triggered by separate thought expression and dedifferentiation is triggered by separate thought expression. And all these thought expressions are triggered by carcinogens. **But the timing of thought expressions is different.** Genetic damage thought expression is first to trigger and later rapid growth and dedifferentiation thought expressions.

3. The Principle of independent assortment--- The principle of independent assortment states that if we consider the inheritance of two or more genes at a time, their distribution in the gametes and in the progeny of subsequent generations is independent of each other. In atomic genetics it will be interpreted like this--- In one phenomenon, if two or more than two transcriptions or thought expressions are expressed that will give rise to two or more than two effects, **it does not mean that their expression is DEPENDENT ON EACH OTHER.**

For example --- In phenomenon of carcinogenesis, there is effect of genetic damage, there is effect of rapid growth and there is effect of dedifferentiation. All these effects are triggered by separate thought expressions. The simultaneous expression of these atomic transcriptions is independent of each other. Or these thought expressions are the part of the carcinogenesis phenomenon but their expressions are independent of one another.

It does mean that for rapid growth thought expression, genetic damage thought expression is NOT essential.

Having informed about the laws and working of atomic genes, Now we discuss phenomenon of carcinogenesis, which is triggered by, outer stimuli like physical, chemical carcinogens or virus or they are self stimulated i.e. hereditary factors.

When Genetic damage is not essential for cancer transmutation then what is the role of Genetic damage? . **Why do carcinogens trigger genetic damage first? How do carcinogens trigger carcinogenesis?**

Fig 30 phenomenon of cell transmutation into cancer

III. CONCLUSION

Our universe is deterministic order of universe and each effect is destined i.e. effects are triggered by thoughts and each thought is fed thought and feeding was done in precreation era by Highest center of the universe . Hence all sciences are made by self knowledge of Almighty Basic building block. Thus Einstein's famous statement that **God (Almighty B.B.B) does not play dice** ultimately became the truth along with final acceptance to **Laplace determinism---** All that had happened had a definite cause and gave rise to definite effect and future of any part of the system could in principle be predicted with absolute certainty if its state at any time was known in all details .

$$W = \int_{k < \Lambda} [Dg][DA][D\psi][D\Phi] \exp \left\{ i \int d^4x \sqrt{-g} \left[\frac{m_p^2}{2} R - \frac{1}{4} F_{\mu\nu}^a F^{a\mu\nu} + i \bar{\psi}^i \gamma^\mu D_\mu \psi^i + \left(\bar{\psi}_L^i V_{ij} \Phi \psi_R^j + \text{h.c.} \right) - |D_\mu \Phi|^2 - V(\Phi) \right] \right\}$$

Strong Depiction of Real Building Blocks of the Universe
Equation of Everything i.e. Quantum Fields)
On Left Side . The World of Everyday Experience, In One
Equation is Fiction .
Light Depiction Of Basic Building Blocks of the Universe
(Mind And Mass) On Right Side

Hence the World of Everyday Experience, In One Equation is Fiction . [12]

FOREWORD MESSAGES - ABOUT NEW PHYSICS

1. **Prof. S.W.Hawking-** His hopes for the attainment of a fundamental theory of nature, and its relevance to the general public, are best summed up in the concluding paragraph of his famous book: "... if we do discover a complete theory, it should in time be understandable in broad principle by everyone, not just a few scientists. Then we shall all, philosophers, scientists and just ordinary people, be able to take part in the discussion of the question of **why it is that the universe and we exist**. If we find the answer to that, it would be the ultimate triumph of human reason, for then we would know the **mind of God**".
2. **Prof. Roger Penrose-** In The **Emperor's New Mind**, a bold brilliant, groundbreaking work , he argues that we lack a fundamentally important insight into physics , without which we will never be able to **comprehend the mind**. More over he suggests, insight may be the same one that will be required before we can write a **unified theory of everything**.

Save Earth From Illusive Researches

Fate of world's knowledge . - Final revolution – Divine Mechanics in physics as shown below .

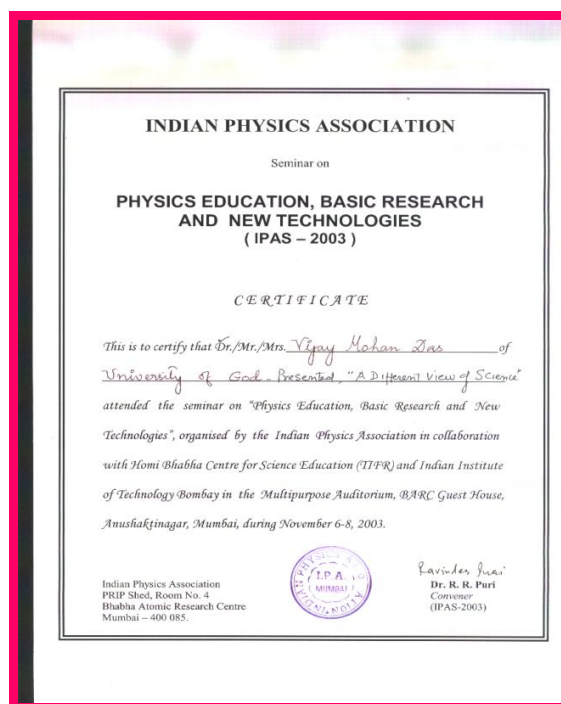

If Spin of particles collapses the entire universe effects(structural effects , physical effects , chemical effects and spectral effects) , life sciences effects would be collapsed. But on the contrary it does not happen . Hence Quantum Mechanics is not correct .

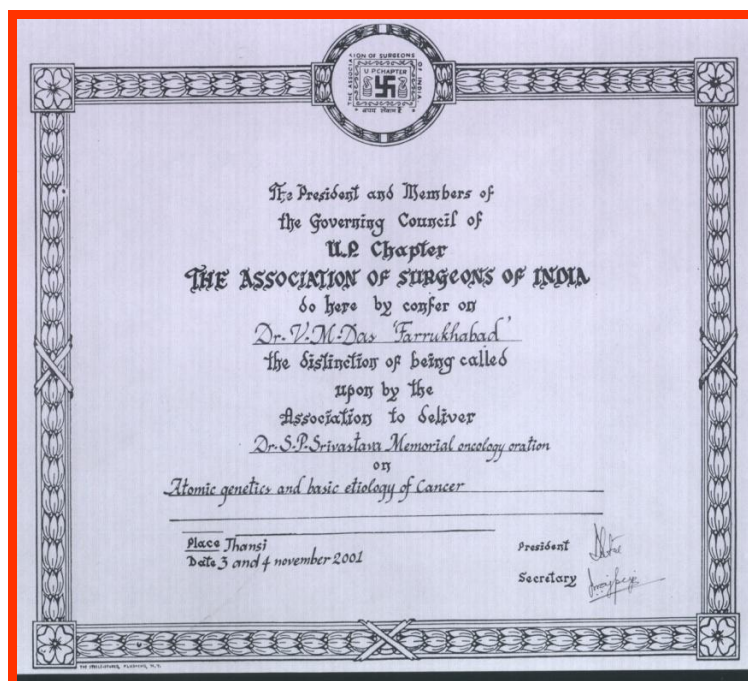

Thanks to Editor of the journal IOSR publishing my work on cancer basic etiology in detail May 2014.

Discussing Mind and Mass realities with Prof. A.P.J.Abdul Kalam , Physicist in Sept 2013 (Ex President of India and winner of Bharat Rattan award) He encouraged me by saying “ Great work “ after 40 minutes of the discussion .

Thanks to D r R.R. Puri who invited me as guest in 2003 in above conference to deliver talk on Physics education and Basic research as regard Mind incorporation in Physics under Different View of Science .

Thanks to Prof H.S Shukla (Oncologist at BHU Medical sciences) considering my research for this oration award in 2001 .
